Dear Hiring Manager,

In pursuit of new creative endeavours, I am seeking an entry level position at WorldBLD. Your company has gained my interest due to its innovative technological methodologies. As a longtime advocate for 3D modelling, seeing the work you do has sparked my curiosity to know more. Finished my Ba and Ma degrees with top grades and my animations have been selected for various awards such as finalist, nomination, and honorable mention. My talent will bring valuable contributions to your team.

Being hard working and organised, highly detail orientated, and driven to eradicate problems, these equal to my foundation for success. I am experienced with the PBR workflow, optimisation of topology, Advanced Skeleton, using Unreal Engine, Maya, Mudbox and Substance Painter. I enjoy spending my personal time developing practical software skills and technical knowledge through online short courses and I take pleasure applying that knowledge in the real world. Gaining valuable experiences in production, I am expanding my understanding of bigger picture criteria and the teams needs within collaborations. Related to animation, I am commonly practicing body mechanics, lip sync, applying animation principles and rigging manually. I find the application of lighting in 3D enchanting, how minimal changes dramatically alter the intended staging.

Currently as a Team Administrator at CISL (Cambridge University), I am enhancing workplace skills. To rapidly apply new learnings to assigned tasks while ensuring efficient communication. This role helped me develop through challenges such as prioritizing my time and workloads under time pressures and improve the team's operational organisation and management. While I greatly value the transferable skills, I passionately yearn for my chance in this industry as a creative individual.

With a proactive mindset, I am eager to train my mind and skills. I greatly value my experiences and embrace new opportunities for growth. Thank you for your consideration. Please do not hesitate to contact me for further information.

Yours sincerely,

Michaela Brückner
